

# FIELD YIELD REPORT

**Co-operator: Frank Elsley**

**Harvest Date: 3/12/2004**

**Address:** Picadilly Gore, Spring Ridge

**Trial Conducted by:** Dave McRae

**Planting Date:** 7th June 2004

**Planting Rate/ha:** 50 kg/ha

**Previous Crop:** Wheat

**Fertiliser:** 220 kg/ha Urea + 100 kg/ha Granulock 12Z

**Herbicide:** 5 g/ha Ally + 500 m/ha LVE MCPA

**Insecticide:** 150 g/ha Pirimor WG

**Comments:** All varieties in trial lodged to some degree. Cameo Arrpo was mature about 7 days before the rest of the trial and the windy condition at harvesting resulted in a 20-30% yield loss due to head breaking off stems. Trial irrigated twice.

Row Width (cm): 30.5 Moisture Correction % 12.5
